Corona Paint Protection Film Installation GEL

We produce PPF installation GEL to prevent the fingerprint, rainbow, glue-mark during the installation. You can prevent all when you use our PPF installation GEL.

How to use Gel

- (1) Spary GEL directly to PSA coated side as well as the top-coated surface.of PPF.
- (2) Put the film on the right position. Then, remove gel from installation area.
(We recommend to use Corona yellow PPF squeegee)
- (3) Clean with wet towel after the installation. Do not leave the gel and dry out

- Package: 1 liter or 20 liter package
- Type: Water-based GEL
Solvent-based GEL
- Required product storage conditions of 20°C ~ 30°C (68°F ~ 86°F)

Optimus XI Paint Protection Film Sealant

We produce the sealant for laminating films to prevent the watermark. As time goes by, the films will get dust, tar, watermark from the acid rain. To minimize it, please apply our sealant.

Optimus XI is the special polymer to protect the surface as new with self cleaning function. When you apply it, you can minimize it.

- Package: 100ml, 1 liter, 20 liter.
- Required product storage conditions of 20°C ~ 30°C (68°F ~ 86°F)

Corona Paint Protection Film DIY Software

With our great quality film, we also have distribution with tint tek 20/20 PPF DIY Program to let our customers install PPF easily. We currently have the most patterns of vehicle, motorcycle, many interior and exterior decal and phone. It is easy to use and cut.

You can save installation time and PPF material.
